ABSTRACT

The Employment Development Department's Migrant Services Section provides temporary housing at reasonable cost for migrant farmworkers and their families. The Office of Migrant Services contracts with agencies of local government to manage programs of housing construction, operation and maintenance. Since 1965 migrant housing projects have been constructed at 25 locations in 14 agricultural counties throughout California. Thus, temporary housing is made available for up to 180 days per year to migrant families while they are employed in agriculture. Covering January through December 1976, this report presents tabular data on the characteristics of the migrant families occupying the 26 migrant housing centers. Given by center, the data pertain to: center occupancy; family size; age of family members; age of male and female family members; annual income by center and by family size; ethnic background; school years completed by persons 18 and over; number of families by length of stay, total days, and average stay; family home base; and operation and peak occupancy dates. In 1976, 87% of those families residing in these centers travelled with their children; the average family size was 5.4 persons; the average annual family income was $4,742; 79.8% were Mexicans while 17.4% were Mexican Americans; and 26.6% were from Texas while 40% were from Mexico. NARRATIVE

California is a major source of agricultural products for the United States and the world. With approximately 8 million acres of land in agricultural crops, California needs and will continue to need a large, mobile agricultural labor force. To meet this need, thousands of people, consisting largely of families, now leave their residence each year to do agricultural work throughout the State.

The major objective of the Migrant Services Section of the Employment Development Department (EDD) is to provide housing for temporary occupancy at reasonable cost for these migrant farm workers and their families. To accomplish this objective, the Office of Migrant Services contracts with agencies of local government to manage programs of housing construction, operation and maintenance.

Since 1965 the Office of Migrant Services has been responsible for constructing migrant housing projects at 25 locations in 14 agricultural counties spread out from Bakersfield to the Oregon border. Through this housing program, temporary housing is made available for periods of up to 180 days per year to migrant families while they are employed in agriculture. (If the crop season is longer than normal, the period of occupancy is extended upon certification of extended labor needs from the Employment Development Department). Every year the number of families turned away has

exceeded the number housed, and in 1976 the number turned away was up 13% over the preceeding year.

The housing projects range in size from 50 to 125 units per center; at each site there are buildings provided for laundry services and day care for young children. The day care and infant care programs offer a twelve hour period of educationally-oriented supervision and care for children whose mothers work in agricultural activities. In addition to the housing and day care services and in cooperation with other state agencies, the Office of Migrant Services also provides educational, health and other social services to residents of the housing centers. Since 1965 these services have been made available to approximately 150,000 persons.

In California there are an estimated 20,000 migrant families having one or more of their members engaged in agricultural labor. In 1976 the Office of Migrant Services provided services to 2,536 of these families whose members constituted a work force of 6,713. In 1976, 87% of those families residing in the state-sponsored housing centers travelled with their children: the average family size was 5.4 persons and the average annual family income of those families staying in the centers was $4,742.

The following statistical summary reflects the scope of services provided by the Office of Migrant Services and the characteristics of the client group the program serves:
